Exploring “Boundless Energy”

What are the 3 sources of renewable energy highlighted in the Boundless Energy exhibit?

Using the “Boundless Energy” exhibit as your guide, consider three different types of technology engineered for each of the sources of renewable energy:

Renewable Energy Source	Technology	Pros	Cons

Name: _____

Solar, wind, and wave energy efficiency varies throughout the world. After viewing the three energy exhibits, create your own map showing the best region for each energy source. First, create a symbol to represent each energy source in the key box, then mark your symbols on the map below.

If you had to choose one technology to invest money in, which one would you choose? Why?

Where in the United States would you put your technology? Why?
