

Name: _____

Comparing Body Systems in Squid and Humans

You dissected a squid and examined how different structures in the squid's body worked together to create systems. Humans also have structures that form systems within their bodies. Compare humans and squid below.

1. Color the following structures that make up the systems on both squid and humans:
 - a. Yellow= skeletal/muscular
 - b. Red= circulatory
 - c. Blue= respiratory
 - d. Orange= digestive
 - e. Purple= sensory/nervous

2. Choose 2 systems from the list. Compare and contrast the structures found in each of the systems in both squid and humans.
