

Name: _____

What is in a habitat? **KEY**

A **habitat** is a place where plants and animals live.

My home is a Ex) house or apartment. This is my **habitat**.

Look outside at your home or school. Draw or write what you see in **this habitat**. *Provide students with observation time at school where there may be plants and animals or assign for homework. Student drawings and answers will vary by location.*

Name: _____

Where are the plants and animals in this **habitat**? *Answers may vary depending on location. There may be grass or other plants on the ground and trees growing around. Examples of animals could be insects on the ground or in plants, birds in the trees or flying in the sky, and small mammals like rabbits or squirrels in the grass or up in the trees.*

What are the animals doing in this **habitat**? *Answers may vary depending on location and type of animal. Examples of behaviors may include crawling, flying, jumping, running, hiding, hunting, eating etc.*
