Caterer Collection

Birch Aquarium promotes conservation through education and research, believing that with increased understanding of the oceans, people will make informed decisions to preserve and protect the planet for future generations. Through science education,

creative programs, exhibits, and hands-on activities, visitors gain knowledge that informs conservation-minded decisions. As a member of the Association of Zoos and Aquariums, Birch Aquarium also works to protect endangered species and reduce the capture of wild species.

We strive to promote the same type of conservation during all of our private events, as well. In our effort to do this, Birch Aquarium has chosen exclusive catering partners who are as passionate about the environment as we are.
